Summary

The hospital supply chain is broken

Supply shortages, price opacity, and manual workflows cost U.S. hospitals over \$10.2M per facility annually and put patient care at risk. AMS AI delivers an end-to-end AI-powered marketplace that cuts procurement time by 85%, uncovers hidden pricing opportunities, and turns fragmented processes into a strategic advantage.

In a \$1.5T medical distribution market ripe for transformation, AMS AI delivers the infrastructure that modern healthcare demands

Why Now?

- Supplies are the **2nd** biggest line item for hospitals
- **15-30%** annual excess costs due to procurement inefficiencies
- Over **5,000 SKUs** managed manually at most hospitals
- **93%** of hospitals report supply shortages that impact patient care
- Up to **100% price** variation for identical products
- Hospital margins are thinner than ever at an average of **1.7%**
- Supply chains are fragile and vulnerable to geopolitical, seasonal, and vendor risk
- AI is adopted at a record pace across healthcare
- Hospitals and staff that fail to leverage AI will not be competitive with those that do

What AMS AI Delivers

15 to 30%

Projected reduction in medical supply costs

85%

Less time wasted by staff on logistics

95%

Reduction in supply-related emergencies

Why We Are Different

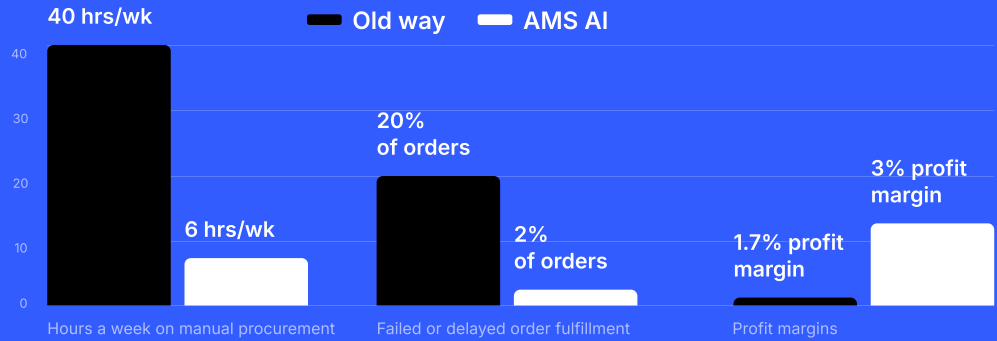

- Built by healthcare and AI professionals for healthcare professionals
- AI trained on clinical knowledge and procurement-specific language
- Real-time pricing and supply availability
- Predictive restocking + budget analytics Integration with no workflow disruption
- Designed for both procurement staff and C-suite executives

Projected Results Before & After AMS AI

Early adopters win with an AI-powered marketplace engine

Gain cost advantage before competitors catch up

Unlock preferred vendor pricing

Ask for What You Need

Enter natural-language requests (e.g., "Need 50 central line kits within 5 days"). AMS AI understands clinical urgency and context instantly

View Best Options

AMS provides quality-verified options from a massive number of trusted suppliers optimized for cost, clinical fit, and safety standards

Get Smart Recommendations

If the top item is unavailable, AMS AI automatically proposes contextually appropriate, cost-conscious alternatives

Automate and Compare

Generate ready-to-go RFP proposals and compare options on price, availability, vendor history, and delivery timelines

Predict Future Needs

Receive proactive alerts for restocking based on past usage patterns, seasonality, and emerging supply chain risks

Deployment

30-60-180 Day Plan

Support

White glove support and hospital executive consulting services
