

A Voice-First Future for Healthcare

A THINKHAT COMPANY | NOT FOR DISTRIBUTION

A Voice-First Future for Healthcare

At Noki, we believe the future of healthcare is personalized, hands-free, and intelligent. We are pioneering a revolutionary approach to healthcare by developing an AI companion specifically designed for physicians and the broader provider community. Our mission is clear: to alleviate physician burnout, reduce administrative burden, and fundamentally transform the way patients and providers interact.

Noki seamlessly integrates with any existing healthcare system's tech stack, and automates administrative tasks to save time across all facets of a provider-patient encounter, in and outside of the clinic space. Our flagship skillset, Noki Scribe, is just the beginning. With 35 AI-driven skill sets in the pipeline and 12 of them set to go live in the next two quarters, Noki is poised to become the most comprehensive and essential tool in any healthcare tech stack.

Imagine a world where physicians are not bogged down by administrative work but instead have more time to focus on what they do best—caring for patients. With Noki, this vision becomes a reality. Our Noki Scribe creates real-time SOAP notes, ensuring consistency and minimizing human error, while our Clinical Decision Support System (CDSS) personalizes patient interactions and enhances the overall care experience. Patient Journey Mapping optimizes care delivery by

providing a holistic view of each patient's health history, enabling better decision-making and more effective treatment plans.

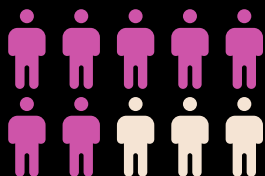

Noki saves healthcare providers 2-3 hours every day by automating administrative tasks, giving back precious time that can be spent saving lives, improving patient care, and reducing overall healthcare costs. Our voice-first AI companion supports every stage of an encounter, pre- to post-, and continuously learns and adapts with each use. With unlimited memory, instant recall, and ongoing evolution, Noki is an indispensable partner in the daily routines of physicians.

In a world where efficiency, accuracy, and patient satisfaction are paramount, Noki stands as the solution that bridges the gap between technology and compassionate care. By addressing inefficiencies and enabling providers to do more with the time they have, Noki not only optimizes workflows but also enhances the quality of care delivered to patients. This is the future of healthcare—where every doctor has an AI companion, and every patient receives the best care possible.

Let's go Noki! Transform the way you deliver care, save time, reduce costs, and elevate patient outcomes. With Noki, the future of healthcare is here, and it's voice-first.

Noki is designed to work as a standalone **AI companion** tool and/or integrate with any EHR within a healthcare tech stack, enhancing administrative efficiency and improving patient outcomes from day one!

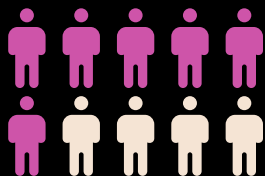

7 out of 10 physicians (71%) agree

EHRs contribute to physician burnout

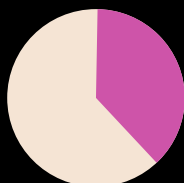

9 out of 10 physicians (90%) want

EHRs to be more intuitive & responsive.

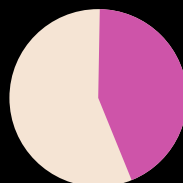

6 out of 10 physicians (59%) think

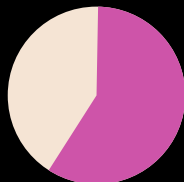

EHRs need a complete overhaul

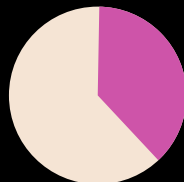

Providers spend around **35%** of their time documenting patient data.

Providers spend around **5-7 minutes**, of a 15 min appointment, looking at a computer.

65% of survey respondents believe that clinical documentation is the first and best place to apply AI-powered solutions.

44% of PCPs say the primary value of their EHR is digital storage

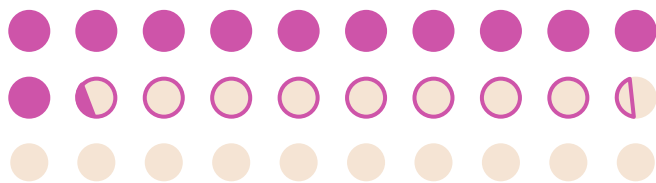

\$0.01 until a positive ROI

As part of our onboarding process, we offer a discovery month followed by an 8-week pilot program for select customers. During this time, we work closely with you to build a strategy and demonstrate clear value—without any additional cost. We believe this approach lays a strong foundation, providing tangible evidence of success before any investment is required.

550-700%

RETURN ON INVESTMENT

1.5-2 hrs saved per day, per physician.

Providers spent an average **30.8 minutes** on each patient during and outside of a visit.

- 11.18 mins** directly with a patient

- 08.30 mins** interacting with the EHR during the patient visit

- 10.60 mins** interacting with the EHR system outside of the patient visit

15-25% estimated time savings

Noki can save 4-8 minutes per patient encounter

Yearly savings breakdown

TIME SAVINGS	\$40,000 - \$48,000
ADDITIONAL REVENUE	\$20,000 - \$30,000
REDUCED TURNOVER	\$7,000 - \$12,000
IMPROVED BILLING ACCURACY	\$5,000 - \$10,000
ESTIMATED SAVINGS PER YEAR PER PHYSICIAN	\$91,800

NOKI PAYS FOR ITSELF IN YEAR ONE

"Welcome aboard! Let's start with a quick chat to understand your needs. We'll walk through what you're looking for, your current challenges, and how we can help. Think of this as a **discovery session** to get everyone on the same page."

"Based on what we've discussed, we'll create a custom **onboarding plan** tailored to your goals. We'll cover key steps, timelines, and any specific tools or integrations you need to get started smoothly."

"Now comes the exciting part—your no Cost **discovery month!** This is where we dive deep into your operations to learn what works, what doesn't, and where we can make improvements. No pressure, just observation and learning."

"Next, we'll roll out the **8-week pilot**. During this phase, we'll test Noki's solutions in your practice to see how they fit and the value they bring. Don't worry—our team will be right there with you, every step of the way."

- Setup and Integration
- Training and Hands-On Support
- Real-Time Monitoring & Adjustments
- Regular Check-Ins and Feedback Loops.
- Optimized Path Forward
- End of Pilot Report
